Application area

For tinting Legno Smart-Öl (7045).

PROCESSING

Processing instructions

- Please stir and shake the product well before use (1 minute shaker).
- The temperature of the product and object, and the room temperature must be at least +10 C.
- The product is ready to use.
- Do not use the product as a coating!
- Use only in combination with the base materials recommended by ADLER.
- Coating systems that have been carefully mixed with Legno Mix (9073) can be used as described in the relevant Technical Data Sheet.
- The product dries through oxidation and can tend to form a skin if left to stand for extended periods. Opened containers should be used up as quickly as possible.
- Any change in the processing sequence, environmental conditions, non-observance of instructions or the use of products not listed may have an unfavourable effect on the result.
- Please read and take note of our working guidelines **ARL 013 – Safety measures required for the use of oils and waxes that dry by oxidation** and **ARL 160 – Working guidelines for oils and waxes**.

Cleaning the working equipment

With Legno-Reiniger (7003) or Adlerol-Terpentinölersatz (7231) immediately after use.
